1 About Albatros iPad Scoring:

The iPad tablet needs to be connected to the web, and to the Albatros URL. On the device a bookmark is created where you find this short cut to access the live scoring module.

Tips :

- Always allow the page to load by ensuring the blue bar moves across the web address
- If you find that the scores under the Startlist page are not updating, press REFRESH
- After capturing players scores remember to SAVE and EXIT
- Activate sleep mode when iPad is not in use to preserve battery life
- Do not place iPad in the direct sun, or expose it to wet conditions
- Most Ipads have only a limited amount of data loaded so don't access other websites
- (eg. Facebook, UTube)
- Print a scorers sheet (from the ATMS) for Ipad users to write on

2 Login

Figure 1

On the home screen look for the green ATMS bookmark and select to continue with login. (Figure 1)

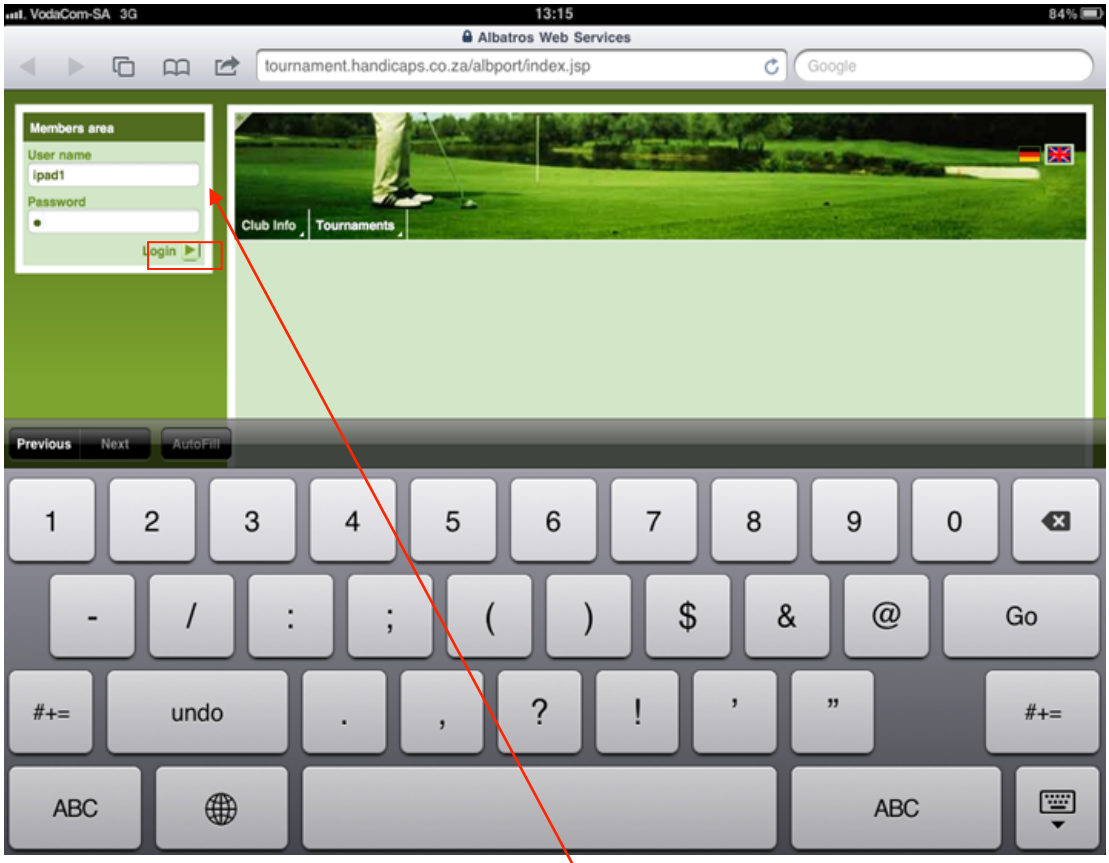

Figure 2

Enter user name and password by selecting the white bar. The keypad will appear, use the keypad to enter the username and password and select the arrow next to login to continue.

The following page should appear after a successful login (Figure 3):

Enter scores using the numbers on the keypad and move between players using the arrow keys. Move the yellow bar to the hole you wish to enter scores in. Should you make a mistake simply enter 0 or replace the score with correct score?

NB!! Once you finish entering the score you must save, either by selecting save and leave (will take you back to previous screen) or save (will remain in same group)

6 Frequently Asked Questions

Questions	Answers
Q1. Why does my Ipad say 'Access denied'?	A1. If you have not worked on the Ipad for any length of time you will automatically be logged out of the Albatros system. Simply log back in again.
Q2. What do I do if I have entered a player's score incorrectly?	A2. Simply go back to the applicable group and change the wrong score. 'Save and Exit'.
Q3. Do I have to write the players scores down on the scorer's sheet?	A3. It is not absolutely essential to do this. The scores can be entered directly into the IPad but it must be remembered that one does not wish to hold the players up in any way and if connectivity is slow it may be better to record the scores. Also, if for some reason you lose Internet connection or connection to the server, scores will need to be recorded until connectivity is restored.
Q4. What do I do if I have accidently got out of the page I was on?	A4. You can usually get back onto a specific page by clicking on the tabs at the top. Alternatively go back to the home screen and select the Green Albatros Icon. Login again.
